

REAR VIEW CAMERA CONNECTION CABLE

for Toyota / Lexus MFD GEN5 Multi-Displays

ID: 861650

EXAMPLES OF STANDARD DEVICES FOR WHICH CABLE IS SUITABLE

The photo is provided for reference only. Appearance of the control panel and monitor may slightly differ depending on the car model.

DESCRIPTION

Cable for rear view camera connection to the Toyota / Lexus MFD GEN5 multi-displays. The cable offers Plug&Play installation of the aftermarket rear view camera without damaging the car wires.

Image from the rear view camera will automatically be displayed on the screen when reversing. The device is connected to the 28 pin socket (as shown in the connection diagram). After connection all OEM functions which work using this socket are preserved due to transit type of connection.

Note! The additionally installed rear view camera should be powered from ACC line (first turn of the key), otherwise the camera input will be not active. Depending on the type of the camera to be connected, namely on the voltage required for the camera, you can use input voltage +6 V, which the monitor produces. In case the camera requires more than +6 V, connect the camera power to ACC line.

COMPATIBILITY

Lexus

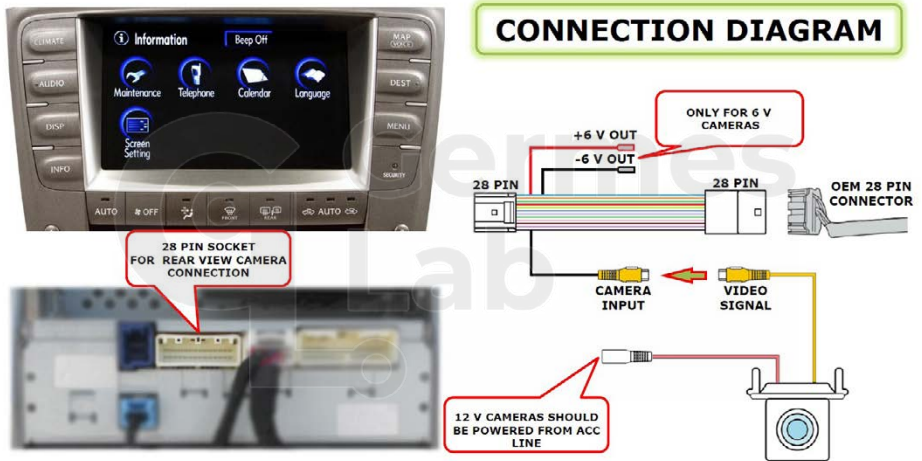

Model	Model years		System	Additional compatibility conditions
