

UNIVERSAL CABLE

for Fakra RCA Video and Camera Connection

ID: 863421

EXAMPLES OF STANDARD DEVICES FOR WHICH CABLE IS SUITABLE

The photo is provided for reference only. Appearance of the control panel and monitor may slightly differ depending on the car model.

DESCRIPTION

This cable is designed for connecting additional video sources, such as rear view cameras, DVD/HD players, or TV receivers, to the OEM media system of a car.

This cable will allow you to easily connect these devices to the OEM head unit without damaging the car wiring. The main compatibility condition for this cable is the presence of Fakra sockets on the head unit. These sockets usually have green, brown or beige (in the case of Ford cars) coloring and are not always located on the monitor. Quite often they are located on the media system to which the monitor is connected.

Note! In most cases, OEM video inputs need to be activated either by the dealer diagnostic equipment or by additional activation devices. In order to connect a TV receiver, a video in motion function should also be activated or additional equipment that activates this function needs to be installed in the car.

COMPATIBILITY

Brand	Type of system/ model years	Type of video input	Video signal format
Audi	2G, 3G, 3G Plus	TV receiver	PAL
Ford	Ford Blaupunkt NX Ford Sync1 with 4.2" Color LCD Ford Sync1 with 5" Color LCD	R-CAM	NTSC
