CAR CAMERA CONNECTION CABLE

to Toyota Touch 2 Monitor / Entune

ID: 847398

EXAMPLES OF STANDARD DEVICES FOR WHICH CABLE IS SUITABLE

The photo is provided for reference only. Appearance of the control panel and monitor may slightly differ depending on the car model.

DESCRIPTION

Cable for rear view camera connection to the OEM monitor Toyota Touch 2. Using this cable you will be able to install the aftermarket camera Plug&Play without damaging the car wires.

Image from the rear view camera will automatically be displayed on the screen when reversing. The device is connected to the 24 pin socket (as shown in the connection diagram). After connection all OEM functions which work using this socket are preserved due to transit type of connection.

Note! The additionally installed rear view camera should be powered from ACC line (first turn of the key), otherwise the camera input will be not active. Depending on the type of the camera to be connected, namely on the voltage required for the camera, you can use input voltage +6 V, which the monitor produces. In case the camera requires more than +6 V, connect the camera power to ACC line.

Note! Only cameras in NTSC format are supported.

Note! This cable is incompatible with Entune 3.0 system.

COMPATIBILITY

Touch 2

| Model | Model years | | System | Additional compatibility conditions |
