

CAMERA CONNECTION CABLE

for Toyota Prius / Lexus RX with
Multifunctional MFD GEN5 Display

ID: 861827

EXAMPLES OF STANDARD DEVICES FOR WHICH CABLE IS SUITABLE

The photo is provided for reference only. Appearance of the control panel and monitor may slightly differ depending on the car model.

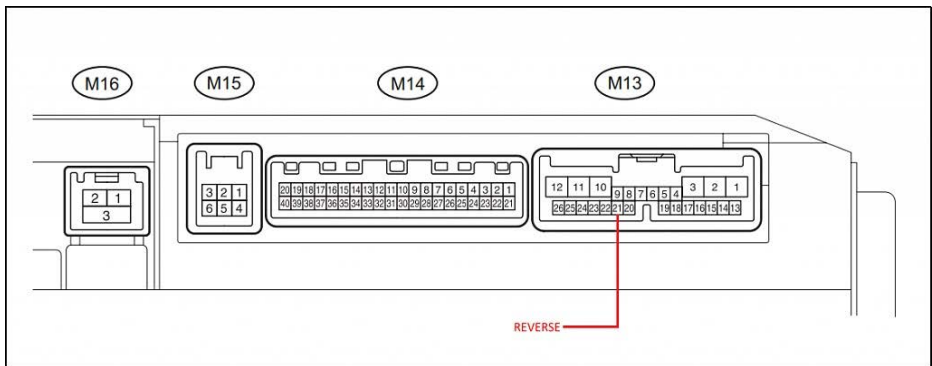

DESCRIPTION

This cable allows you to connect rear view cameras in Toyota / Lexus cars with OEM multimedia system of 5th generation 5GEN. The cable offers Plug&Play installation of aftermarket cameras without damaging the OEM wiring.

Image from the rear view camera will automatically be displayed on the screen when reversing. The device is connected to the 40 pin socket (as shown in the connection diagram). After connection all OEM devices that work using this socket will not be disturbed and will continue to work as they did prior to the connection.

Note! Power of the additional rear view camera should be taken from the ACC line (first key turn), otherwise the camera input will not be active. Depending on the type of camera (more specifically, on the voltage required for work) +6 V output voltage of the monitor may be used. If the camera requires more than +6 V it should be connected to the ACC line.

Note! In some cases the head unit may not have a REVERSE wire. If that's the case, you need to extend the wire from the +12 V tailgate lamp as the cable will not work otherwise.

COMPATIBILITY

Lexus

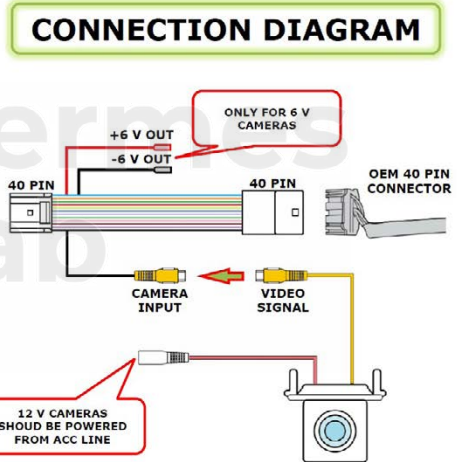

Model	Model years		System	Additional compatibility conditions
	From	To		
RX350	2007	2009	MFD GEN5 multi-display	Cars with OEM navigation Cars without OEM navigation
RX400h	2007	2008		Cars without OEM park assist function

Toyota

Model	Model years		System	Additional compatibility conditions
	From	To		
Prius	2006	2009	MFD GEN5 multi-display	Cars with OEM navigation Cars without OEM navigation
Prius Touring	2006	2009		Cars without OEM park assist function
