CAMERA CONNECTION CABLE

for Lexus with Enform GEN8 Media-Navigation System

VIDEO IN
MOTION NOT
SUPPORTED

Germes Lab

ID: 866319

EXAMPLES OF STANDARD DEVICES FOR WHICH CABLE IS SUITABLE
The photo is provided for reference only. Appearance of the control panel and monitor may slightly differ depending on the car model.

DESCRIPTION

This cable allows you to arrange audio and video input in Lexus cars with GEN8 13CY/15CY EU media-navigation system without using a video interface. After the cable connection «AV input» icon is automatically activated in the monitor. Video in motion function will not be activated. Therefore, in order to watch video on the car monitor, it has to be parked first, and the hand brake must be on. As a result you receive fully functional AV input with possibility to connect composite video signal PAL/NTSC and also linear stereo signal.

Checking for compatibility is quite simple: if the joystick is shaped as a disk or a puck and the main menu is of the «carousel» type then you can use this cable in your car.

Thus you will be able to connect the video device, e.g. HD player, Android box, smartphone mirroring adapter or TV receiver to the OEM monitor without using the video interface. All OEM functions of the monitor will work in the same way as before.

The cable is connected to the 28-pin connector behind the main media box, where the radio receiver is installed. (check the connection diagram).

COMPATIBILITY

Model	Model years		Head unit	Additional compatibility conditions
	From	To		
CT200h	2014	2019	FujitsuTen GEN8 13CY/15CY EU 8th generation, car models of the EU market	Cars with OEM navigation system Cars without OEM navigation system Cars equipped with Lexus Display Audio Controller
