ADVANTAGES

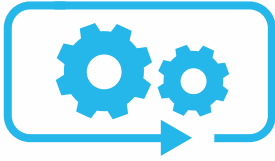

Rear view camera is an irreplaceable assistant for any car owner. Such camera will let you see everything happening behind your car on the OEM monitor. It makes the car safer for both you and the people around, and it also helps you protect the car from damages. Thanks to GermesLab, connecting a rear view camera has become incredibly easy!

Our engineers have developed a simple, affordable and easy-to-install solution — special cables which allow you to connect an aftermarket rear view camera to an OEM monitor without a video interface. Moreover, you don't need to cut the car wiring so you have virtually no chance to damage it. Consequently, there will be no warranty issues.

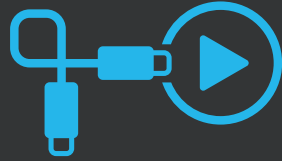

Image from the connected rear view camera will be automatically displayed on your car monitor when you shift to the rear gear. It means that an aftermarket camera will work as a stock one. All OEM functions will continue working the way they worked before the camera connection. You don't have to spend money on video interfaces and mess with wires any more.

**CABLES FOR REAR VIEW
CAMERAS CONNECTION —
NO MORE CAR HEADACHE!**

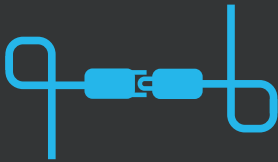

Fast and easy
installation

Plug&Play
connection

No damage to OEM car
wiring

All OEM functions continue working
as they did before installation

No risk of voiding your car
warranty

Less expensive than a video
interface

WE ARE OFFERING CABLES FOR THE FOLLOWING CAR BRANDS:

CITROËN

Citroën

Dacia

Fiat

Ford

HONDA

Honda

Lexus

mazda

Mazda

Nissan

Opel

PEUGEOT

Peugeot

**RANGE
ROVER**

Range Rover

RENAULT

Renault

Scion

SUBARU

Subaru

TOYOTA

Toyota

VAUXHALL

Vauxhall

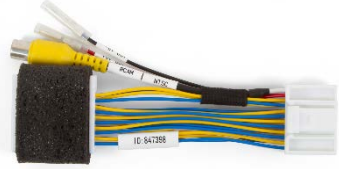

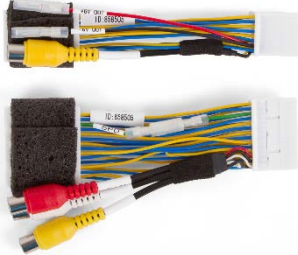

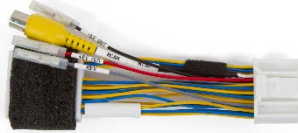

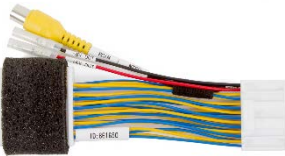

Volkswagen

We are constantly updating the compatibility list. For full information regarding compatible car brands and models, go to page 11.

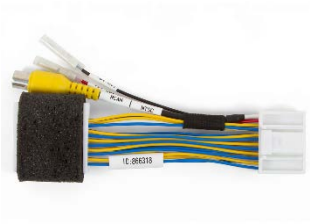

NOTE! Only cameras in NTSC format are supported.
